(54) Title: METHODS OF CLONING AND PRODUCING FRAGMENT CHAINS WITH READABLE INFORMATION CONTENT

WO 01/00816 A1

(57) Abstract: The present invention provides a method of attaching a fragment of a first nucleic acid molecule to a second nucleic acid molecule using adapters to mediate the binding, particularly in methods of cloning, methods of producing fragment chains with a readily readable information content, particularly comprising fragments corresponding to code, such as alphanumeric code, the nucleic acid molecules thus produced and kits for performing such methods.
